SUMMARY

Software Engineer with 1+ year of experience building full-stack and AI-powered web applications with Python (FastAPI), TypeScript (Next.js, Node.js), PostgreSQL and MySQL. Delivered an AI audit and diligence platform and a multi-tenant Shopify B2B commerce app end to end, from database design and APIs to user interfaces, third-party integrations and deployment. Experienced in LLM function calling, retrieval-augmented generation (RAG) and human-in-the-loop AI workflows, with a focus on building reliable, secure and maintainable software.

TECHNICAL SKILLS

- **Languages:** Python, TypeScript, JavaScript, SQL
- **Backend:** FastAPI, Pydantic, Node.js, REST APIs, GraphQL, Webhooks, Message Queues
- **Frontend:** Next.js, React.js, React Router (Remix), Tailwind CSS, Shopify Polaris
- **Databases:** PostgreSQL (Supabase, pgvector), MySQL, Prisma ORM
- **AI & LLM:** Claude API, LLM Function Calling, RAG, Embeddings, Vector Search, Prompt Engineering
- **Cloud & DevOps:** Docker, GitHub Actions, Jenkins, Modal, Vercel, SonarQube, Linux, Git

PROFESSIONAL EXPERIENCE

Software Engineer I | i95Dev, Hyderabad | Jul 2025 - Present
AI Diligence & Audit Platform (Client: GateCity Advisory)

- Built the Media Audit module end to end: ledger import, audit population, statistical sampling (random, top-value, monetary-unit), test design, evidence-linked results, client request lists and PDF reports.
- Developed an AI audit assistant using LLM function calling that proposes audit steps, tests and requests; every AI suggestion is confirmed by a user before any data changes.
- Built an AI test designer that turns plain-English audit checks into validated, runnable flowchart tests, and an AI value reader that only accepts figures it can quote from the source page.
- Built document Q&A (RAG) with hybrid vector and keyword search, citing each answer with the exact value highlighted on the source page.
- Built automatic filing of AI-classified documents with a human review queue, and audit tests that run automatically when new evidence arrives.
- Added Microsoft Entra ID single sign-on and role-based access control; cut audit page load from 12 s to 1.3 s.
- **Tech:** Python, FastAPI, Next.js, TypeScript, PostgreSQL (Supabase, pgvector), Claude, Modal

B2B Commerce Platform: Shopify App and B2B Portal

- Built two-way sync between Shopify, the B2B portal and ERPs (Dynamics 365 Business Central, NetSuite) for products, orders, companies, customers, pricing and invoices using queues with retries.
- Built the B2B pricing engine (price lists, tier and volume pricing, customer-group discounts) and displayed B2B prices on the Shopify storefront through a theme app extension.
- Built B2B checkout with purchase orders, credit-limit checks and server-side price validation, plus order edit and cancellation sync with the ERP.
- Delivered multi-currency support (Shopify Markets), subscription billing and merchant onboarding.
- Moved the Shopify integration from REST to GraphQL for App Store compliance, cutting API calls for 250 orders from 250 to 3, and merged two databases into one shared MySQL schema.
- **Tech:** Node.js, React Router, Shopify Polaris, Prisma, MySQL, Shopify GraphQL API, Jenkins

EDUCATION

B.E. in Information Technology, Maturi Venkata Subba Rao Engineering College (MVSR), Hyderabad | Jun 2025
CGPA: 9.19
Intermediate, Sri Chaitanya Junior Kalasala | 95.8% | 2021 Class X, Sri Chaitanya School | CGPA: 10.0 | 2019

CERTIFICATIONS

- Anthropic: Claude Code in Action; Building with the Claude API (2026)
- AWS AI/ML Virtual Internship (2023) and Google AI/ML Virtual Internship (2024), AICTE-Eduskills
